

Implementation of Robot Behaviour Learning Simulator

Kushagra Singh Bisen.

kushagrasingh.bisen@etu.emse.fr

Work in last 3 days.

- I spent time working with running the code on the server, there were some problems and I'm working on them.
- I spent time trying to migrate from turtlebot2 to turtlebot3 which is a work in progress.
- Regarding the log file, I found the method to do such. I can explain the method now. Although, I wasn't successful in writing a function to print the costmap neighbours over the whole path list.
- I read some basic path planning algorithms which can be useful in our work.

The Method for Log File.

I will now explain the method for log file generation and I will try my best to do it till Monday/Tuesday. I will be working on it during my weekends.

**Thank you so
much for your
time.**
